Aims of the Course	The objective of this course is to convey to students the historical and structural transformation processes that the Turkish economy has undergone from the founding of the Republic to the present day. Within the scope of the course, it is aimed to analyze macroeconomic indicators in Turkey (national income, growth, inflation, unemployment), the economic policies implemented (import-substitution, export-led growth, etc.), and the structure of key sectors such as agriculture, industry, and services. Thus, the course aims for students to acquire the ability to interpret the interaction between global economic developments and the Turkish economy from a dynamic perspective, to analyze current economic problems, and to develop solutions for these issues.
