Learning Outcomes

#	Learning Outcome
1	Critically compare and evaluate classical and contemporary developmental theories, discussing their contributions and limitations for developmental research.
2	Evaluate research designs, measurement tools, and data collection methods used in developmental psychology with respect to scientific rigor, validity, reliability, and ethical principles.
3	Critically analyze contemporary research topics in developmental psychology—including digital media, artificial intelligence, pro-environmental behavior, and cross-cultural development—while incorporating principles of open science and research ethics to formulate research proposals.
