Pearson Education.
Work Placement	none
Aims of the Course	The aim of this course is to enable teachers to understand the fundamental concepts, principles, theories, and approaches related to school management from both theoretical and practical perspectives, and to analyze the relationships between educational management theories and school management practices. Furthermore, the course aims to enable teachers to critically evaluate the organizational and administrative structure of the Turkish education system, examine the changing duties, roles, and responsibilities of school administrators, and relate educational leadership, decision-making, communication, coordination, supervision, and change management processes to their professional experiences. Within the scope of the course, teachers are expected to evaluate the managerial problems they encounter in their educational institutions through scientific, systematic, and critical approaches, integrate theoretical knowledge with real-life cases from school settings, and develop practical solutions to managerial challenges. In addition, the course aims to contribute to the development of teachers’ professional and managerial competencies by fostering their ability to evaluate the effects of social and technological transformations, particularly digitalization and artificial intelligence applications, on school management, while encouraging the adoption of ethical, participatory, innovative, and human-centered management approaches.

Course Syllabus

Weeks	Learning Outcomes	Topics	Teaching Methods
Week - 1	LO-1	Basic concepts of organization	Lecture, Question & Answer, Discussion, Brain Storming
Week - 2	LO-1	Basic concepts of education	Lecture, Discussion, Case Study, Brain Storming
