Work Placement	None
Aims of the Course	The models regarding the beginnings of the Neolithic process in the Fertile Crescent, which started primarily in the Levant region during the Epi-Paleolithic period in the Near East and became more pronounced during the Pre-Pottery Neolithic period—will be evaluated, covering topics such as climate change, the transition to sedentary life, subsistence systems, surplus, and the transition to a production economy. The archaeological traces of these processes and the evaluation of findings from excavations will also be discussed.
