Work Placement	N/A
Aims of the Course	The objective of the Labor Market Analysis course is to examine the functioning of labor markets, the factors determining labor supply and demand, wage formation, and the dynamics of employment and unemployment within theoretical and empirical frameworks. Within the scope of the course, it is aimed to analyze the effects of elements such as inequalities in the labor market, wage differentials, human capital, education, technological change, gender, and demographic structure on employment. Furthermore, the course aims to develop students' skills in interpreting statistical data and economic indicators related to the labor market, evaluating current labor market issues using scientific methods, and analyzing the economic and social consequences of employment policies.
