Aims of the Course	The aim of this course is to examine the structure and functioning of labour markets from economic, social, and institutional perspectives, and to evaluate employment, unemployment, labour force participation, and wage dynamics through the analysis of key labour market indicators. The course covers labour supply and demand, the main determinants of labour market outcomes, employment and unemployment indicators, labour force participation rates, wage differentials, occupational and skills mismatches, and gender-based and other inequalities in the labour market. Particular emphasis is placed on obtaining, interpreting, and comparatively evaluating labour market data. The course aims to enable students to analyse national and international labour market indicators, identify key trends and structural problems based on data, critically evaluate research findings, and develop evidence-based recommendations for employment policies.
