Course Syllabus

Weeks	Learning Outcomes	Topics	Teaching Methods
Week - 1		The Concept of Sustainability Examination of the definition, historical development, and fundamental dimensions of the concept of sustainability.	
Week - 2		Sustainability and Design Establishing the relationship between sustainability and design, and discussing the role of design in terms of sustainability.	
Week - 3		Sustainability Design Principles and Process Examination of the fundamental principles of sustainable design and the design process.	
Week - 4		The Concept of Sustainable Design Approach Introduction to the concept of the sustainable design approach and evaluation of its scope.	
Week - 5		Sustainable Design Approach and Fundamental Principles A detailed examination of the fundamental principles of the sustainable design approach.	
Week - 6		Discussion of Sustainable Design Approach Applications Examination and discussion of application examples regarding the sustainable design approach.	

Course Syllabus

Weeks	Learning Outcomes	Topics	Teaching Methods
Week - 7		Midterm Exam Evaluation of the theoretical knowledge and conceptual framework acquired during the first six weeks.	
Week - 8		Design for the Future Introduction to the concept of design for the future and its examination within the context of sustainability.	
Week - 9		Human-Nature Relationship Interpretation of the human-nature relationship from a design perspective and examination of the impact of this relationship on sustainable design.	
Week - 10		Creating Environmental Awareness and Drawing Attention to Environmental Issues Examination of approaches aimed at creating environmental awareness and drawing attention to environmental problems through design.	
Week - 11		Çevresel Duyarlılık Yaratma Tasarım aracılığıyla çevresel duyarlılık oluşturmaya yönelik stratejilerin ve uygulamaların incelenmesi.	
Week - 12		Discussion of Sustainable Design Approach Applications Discussion and evaluation of sustainable design approach applications through student projects.	
Week - 13		Discussion of Sustainable Design Approach Applications Development of student projects, addressing deficiencies, and preparing them for presentation.	
Week - 14		Final Examination Evaluation of the acquired theoretical knowledge and conceptual framework.	

Learning Outcomes

#	Learning Outcome
1	Explains the concept of sustainability, the relationship between sustainability and design, and the fundamental principles of the sustainable design approach.
2	Develops sustainable solutions to design problems by applying the principles and processes of sustainable design.
3	Gelecek için tasarım anlayışı doğrultusunda insan-doğa ilişkisini yorumlayarak çevre bilinci yaratma, çevresel sorunlara dikkat çekme ve çevresel duyarlılık oluşturma odaklı tasarımlar üretir.
4	Discusses and evaluates the applications of the sustainable design approach and reflects these approaches in their own design process.
